

Air 1 has been a great asset to our community. One can listen to Air 1 without hearing things that are offensive. The music appeals to many different age groups & types of people. They are very positive & helpful to people who call in. If Air 1 was displaced by an LPFM broadcaster providing other programming, where would people turn to find decent music & talk? Air 1 is in the public interest because we need all the positive, decent, family oriented programing we can get.
